Is Forcing of Gladioli Profitable?

Here are a few wholesale prices, taken from the Florist Review during different parts of the last season, (1920);

		Per 100		
May 5, 1920,	Boston	\$12.00	@	\$16.00
May 12, "	St. Louis	\$15.00	@	25.00
May 2, "	Philadelphia	\$12.50	@	
June 2, "	Chicago	12.00	@	15.00
June 19, "	Milwaukee	1.50	@	2.00

These were not the prices for the first flowers but for ALL FORCED GLADIOLI.

Forcing Gladioli in between your Carnations, which is done now by a large percentage of the better florists, makes the expenses of forcing them extremely low.

It is an established fact that putting gladioli between the carnations, does absolutely not harm either crop, unless Carnations are planted too close.

For successful forcing of Gladioli it is vital, not to use "picked-up" or "bargain" lots; most of the time you will find yourself disappointed. For forcing, a Bulb should be used, containing absolute "FORCING QUALITY", by its variety, strength and method under which it is grown. Those who know prefer Michigan-grown stock. Sand-grown Bulbs are better adapted for forcing. By "topping" our flowers we leave all the "pep" in the bulbs, giving them a "PLUS-QUALITY", which makes our stock so suitable for Forcing.

WHEN YOU ORDER GLADIOLI FOR FORCING BE SURE TO MENTION
THIS IN YOUR ORDER

GLADIOLI IN COLDFRAMES

To produce flowers about two weeks ahead of flowers from field-grown bulbs, plantings should be made the middle of March or to suit climatic conditions. The frames should be ready then and the sash removed not before danger from frost is over. The bulbs should be planted from 4 to 6 inches apart and an extra supply of plantfood must be provided. Dilute liquid sheep manure twice a week after the plants have made some growth is advisable, also half a handful of nitrate of soda to a gallon of water is good.

As for forcing in greenhouse, the early varieties are also most advisable for this purpose.

CANNAS NOW READY

Most useful varieties, extra large and strong healthy stock 2 eyes and up.
Order Early

The Cannas, offered here, are grown in Michigan Soil; they possess a wonderful root system and surely should not be compared with those grown in other parts of the country.

Our customers believe our Cannas are the finest stock obtainable, while prices quoted by us are not higher, in some instances even lower, than offered by other sources.

DAHLIAS NOW READY

THE PROPER SELECTION FOR THE MODERN FLORIST AND GROWER

Well-formed flowers, borne on good strong erect stems. It is not our ambition to catalog hundreds of varieties, but to put in our list the cream of our experience in the Dahlia culture.

Too many old, now worthless, varieties are offered which overshadow those wonderful modern Dahlias and the result is that many a florist or grower is thru trying Dahlias. Still, there is no plant, which at so little a cost produces such an abundance of flowers.

Don't fail to try this list, it will show you what those Dahlias mean to you as cutflowers, bouquets or other decorations.

ALL DAHLIAS STRONG FIELD-GROWN DIVISIONS.

Imported Dutch Bulbs, Hyacinths, Tulips, Narcissus and Crocus FOR FALL DELIVERY

All prices mentioned for Dutch and French bulbs are f. o. b., New York, duty and freight paid to that port.

As our prices in this list are the original Dutch Export Prices, we will as usual collect on delivery our cash outlay for duty and Freight to New York, which item will be deducted from your invoice as payment on account.

The following list of Dutch bulbs contains the varieties that proved, by long experience, to answer the purpose, for which they are used in this country, the best. We believe it confusing to hand our friends long columns of varieties of which 75% never amounted to commercial value whatsoever. If there's a special variety you want but not listed please ask us for prices.

NOTICE

On request of customers we will accept Dutch Bulb orders at open price and charge prevailing market price at time of shipment.

All orders are filled from Holland in rotation. To insure earliest delivery you should not delay sending us your order.

DARWIN TULIPS

The most beautiful of all tulips; tall stems, brilliant colors, and may be forced in bloom "easily" in February, March and April. Also very profitable in coldframes.

On account of the climatic conditions in this country, especially in the Middle-Western states, Darwins are the most advisable tulips for outside plantings. Stems from 21 to 30 inches

OUR RELIABLE HARDY PLANTS

HERBACEOUS PERENNIALS

For spring and fall delivery

You will find our Perennials the best and most satisfactory.

Because we make it our point to give you SERVICE, QUALITY and VALUE. Besides, the soil they are grown in possesses qualities that can hardly be copied anywhere but around the nursery centers of Boskoop, Holland. Our plants make REAL ROOTS, and what is more important to a plant than a GOOD ROOT SYSTEM?

All plants offered in this list are strong field-grown, no seedlings nor slips, but real plants that will give results and satisfaction. They are far better than pot grown plants, as they are more vigorous and healthy, and sure to flower in abundance the first year. The nursery is a real garden itself, so why question results when they are a year older. We want your business and keep it, for we are producing more every year. You will not appreciate our stock and good service until you have convinced yourself by a trial order.

Prices are net, subject to change without notice. Packing extra at cost.

Terms on Perennials: strictly 30 days net, 2% 10 days, 5% cash with order.
